Olympia, Washington

Attention: Mr. E. F. Eldridge  
Director and Chief Engineer

Dear Mr. Eldridge:

The local plant of the Western Gas Company of Washington is now dumping waste products, including considerable liquids, at the local refuse disposal site operated by Puget Service Company. We are wondering if there is a possibility of such material getting into underground water and possibly reaching wells and springs in the vicinity of the disposal site.

Should you wish to investigate this matter we will be glad to accompany you to the area.

Yours very truly,

DEPARTMENT OF PUBLIC HEALTH  
Bremerton-Kitsap County
